Contents Volume 57, 1993

Invited papers

Interrelationships between soil structure/texture, soil biota/soil organic matter and crop production
N.G. Juma 3

Gas, water and solute transport in soils containing macropores: a review of methodology
W.M. Edwards, M.J. Shipitalo and L.B. Owens 31

Simulation modelling as a method to study land qualities and crop productivity related to soil structure differences
J. Bouma and M.J.D. Hack-ten Broeke 51

Contributed papers

Modelling the geometry of worm burrow systems in relation with oxygen diffusion
C. Rappoldt 69

Relationships amongst organic matter content, heavy metal concentrations, earthworm activity, and soil microfabric on a sewage sludge disposal site
A.D. Tomlin, R. Protz, R.R. Martin, D.C. McCabe and R.J. Lagace 89

Relationships between soil texture, physical protection of organic matter, soil biota, and C and N mineralization in grassland soils
J. Hassink, L.A. Bouwman, K.B. Zwart, J. Bloem and L. Brussaard 105

A method for the three-dimensional mapping of earthworm burrow systems
T.N. Ligthart, G.J.W.C. Peek and E.J. Taber 129

Water movement, oxygen supply and biological processes on the aggregate scale
P.A. Leffelaar 143

Round tables

Round Table on water movement, oxygen supply, nutrient supply, and biological processes on the micro-scale
R.P.A.C. Raats 167

Translation of soil features across levels of spatial resolution — Introduction to round table discussion
R.J.F.Th. Schoute 171

Editorial i

Discussion Paper and Comments

Soils as biotic constructs favouring net primary productivity
N. Van Breemen 183

The soil as a model for the Earth
J.E. Lovelock 213

Response: a pedologist perspective on soils as biotic constructs favouring net primary productivity
L.P. Wilding and E.F. Kelly 217

The evolutionary basis of biogeochemical soil development
F. Stuart Chapin III 223

Author's epilogue
N. van Breemen 229

Research Papers
Prediction of dynamic hydraulic properties in a ripening soil
D.J. Kim, J. Feyen and H. Vereecken 231
Reducing variance in soil organic carbon estimates: soil classification and geostatistical approaches
R. Yost, K. Loague and R. Green 247
Structural investigations of humic acid from leonardite by spectroscopic methods and thermal analysis
G. Ricca, L. Federico, C. Astori and R. Gallo 263
Variations in weathering processes and rates with time in a chronosequence of soils from Glen Feshie, Scotland
D.C. Bain, A. Mellor, M.S.E. Robertson-Rintoul and S.T. Buckland 275
Stages and rate of the gravel shattering process by salts in desert Reg soils
R. Amit, R. Gerson and D.H. Yaalon 295

Book Review
Bodenchemie by W. Ziechmann and U. Mueller-Wegener – J.P.G. Loch 325

Research Papers
A quantitative Australian approach to medium and small scale surveys based on soil stratigraphy and environmental correlation
N.J. McKenzie and M.P. Austin 329
Critical conditions for rill initiation on sandy loam Brunisols: laboratory and field experiments in southern Ontario, Canada
W. Merz and R.B. Bryan 357
A method for identifying soil catenas and determining map unit composition used in a reconnaissance soil survey in Tanzania
B.D. Acres, M.A. Green and L.J. Rackham 387
An examination of the Guelph permeameter for measuring the soil's hydraulic properties
A.P. Salverda and J.H. Dane 405
Andisol formation in a Holocene beach ridge plain under the humid tropical climate of the Atlantic coast of Costa Rica
A. Nieuwenhuyse, A.G. Jongmans and N. Van Breemen 422
Soil development on the 1888 Bandai mudflow deposits in Japan
K. Morisada and Y. Ohsumi 443

Current Titles in Soil Science 459

Announcements 475
